

Availability of SID Data Elements by State in 1998-2001

In 1998, the HCUP Central Distributor databases, including the SID, were reconstructed into the following files:

Core	Contains the data elements that are provided by most state Data Organizations which can be uniformly coded across states, and state-specific data elements that are available from a few state Data Organizations and usually retain state-specific coding.
Charges	Contains data elements related to detailed charges information.
AHA Linkage	Contains hospital identifiers used by the data sources, the AHA, and by HCUP.

Because the Data Organizations decide which elements may be released on the HCUP Central Distributor databases, not all data elements will be available for all States.

In the 1995-1997 SID, a different placement of data elements in files was in effect; for a description of those files, see **Availability of SID Data Elements by State in 1995-1997** (on the SID Documentation CD-ROM).

The AHA Linkage file has one change:

- C The HCUP variable IDNUMBER (AHA identifier without the leading 6) is no longer included in the AHA Linkage file. The file will continue to include the HCUP variable AHAID (AHA identifier with leading 6) which is identical to the AHA hospital identifier on the AHA Annual Survey of Hospitals data files. Having two versions of the variable has confused purchasers in the past.

The following table (page 2) shows:

- C the location of each data element within the different SID files, and
- C the availability of data elements across the individual states.

The first column specifies the data element. The next three columns identify the three types of SID files. The remaining columns refer to the states using the state postal code (e.g., CA for California, CO for Colorado). Cells marked with an "x" indicate that the data element is available for that file or state. Blank cells indicate that the data element is not available for that file or state. Not all HCUP data elements are available for all states. For information on how the HCUP data elements are defined, refer to the **Description of SID Data Elements** (on the SID Documentation CD-ROM).

When multiple data elements of the same type are available, the number of data elements available is specified in the state cell. For example, the state cell for diagnoses (i.e., DXn) identifies the number of available diagnoses. CA has 30 diagnoses: 1 principal diagnosis and 29 secondary diagnoses. Not all diagnoses are coded on all records.
